DATA SHEET

EYP-RWE-0840-06515-1500-SOT02-0000

Revision 1.12

GAIN CHIPS AR coated Fabry-Perot Laser

General Product Information

Product	Application
widely tunable 840 nm modified Fabry-Perot Laser	Spectroscopy
for use in an External Cavity Diode Laser (ECDL)	covering wavelengths
sealed SOT Housing	between 800 and 860 nm
Monitor Diode	

Absolute Maximum Ratings

Parameter	Symbol	Unit	min	typ	max
Storage Temperature	Ts	°C	-40		85
Operational Temperature at Case	T _C	°C	-20		50
Forward Current	I _F	mA			200
Reverse Voltage	V _R	V			0
Output Power (extracavity)	P _{opt}	mW			100

Recommended Operational Conditions

Parameter	Symbol	Unit	min	typ	max
Operational Temperature at Case	T _C	°C	15		40
Forward Current	١ _F	mA			180
Output Power (extracavity)	P _{opt}	mW			80

Characteristics at 25° C at Begin Of Life

Parameter	Symbol	Unit	min	typ	max	
Center Wavelength	λ_{c}	nm		840		
Tuning Range	$\Delta\lambda_{tun}$	nm	800		860	
Output Power (extracavity)	P _{opt}	mW		50		
Cavity Length	L	μm		1500		
Reflectivity at Front Facet	R _{ff}			3 [.] 10 ⁻⁴	1 [.] 10 ⁻³	
Polarization				TE		
Spatial Mode (transversal) TEM ₀₀						
Spectral Mode (longitudinal)			Single/Multi Mode			
Divergence parallel (FWHM)	$\Theta_{ }$	0		10		
Divergence perpendicular (FWHM)	Θ_{\perp}	0		23		

Measurement Conditions / Comments

Stress in excess of one of the Absolute Maximum Ratings can cause permanent damage to the device. Please note that a damaging optical power level may occur although the maximum current is not reached.

Measurement Conditions / Comments

Measurement Conditions / Comments

Tuning range and output power are estimated from the gain profile of the laser. The actual achieved wavelength and power are strongly influenced by the external cavity. Therefore eagleyard Photonics will give no guarantee on these parameters.

Fundamental Mode
depending on operating conditions
parallel to Pin 2 - Pin 3 plane (see p. 3)
perpendicular to Pin 2 - Pin 3 plane (see p. 3)

Monitor Diode

GAIN CHIPS AR coated Fabry-Perot Laser

Parameter	Symbol	Unit	min	typ	max
Monitor Detector Responsivity ($U_{R MD} = 5 V$)	I _{mon} / P _{opt}	μA / mW		20	

Package Dimensions

Parameter	Symbol	Unit	min	typ	max
Height of Emission Plane	d _{EP}	mm	3.50	3.65	3.70
Excentricity of Emission Center	R	mm			0.12
Pin Length	I _{PIN}	mm		14	

Measurement Conditions / Comments reference plane: top side of TO header reference: center of outer diameter of header

Measurement Conditions / Comments

depends on the intracavity power of the ECDL setup

Package Pinout

- 1 Laser Diode Cathode, Monitor Diode Cathode, Case
- 2 Photo Diode Anode
- 3 Laser Diode Anode

M-type

Revision 1.12

GAIN CHIPS AR coated Fabry-Perot Laser

Typical Measurement Results ex cavity

Unpacking, Installation and Laser Safety

Unpacking the laser diodes should only be done at electrostatic safe workstations (EPA). Though protection against electro static discharge (ESD) is implemented in the laser package, charges may occur at surfaces. Please store this product in its original package at a dry, clean place until final use. During device installation, ESD protection has to be maintained.

The RWE diode type is known to be sensitive against thermal stress. It should not be operated without appropriate optical feedback from an external cavity. Operating at moderate temperatures on proper heat sinks will contribute to a long lifetime of the diode.

The laser emission from this diode is close to the invisible infrared region of the electromagnetic spectrum. Avoid direct and/or indirect exposure to the free running beam. Collimating the free running beam with optics as common in optical instruments will increase threat to the human eye.

Each laser diode will come with an individual test protocol verifying the parameters given in this document.

Performance figures, data and any illustrative material provided in this specification are typical and must be specifically confirmed in writing by eagleyard Photonics before they become applicable to any particular order or contract. In accordance with the eagleyard Photonics policy of continuous improvement specifications may change without notice.
